SOFTWARE DEVELOPMENT PROJECTS

EventScene — *React Native App*

- Native IOS and Android app that utilizes Google Maps to display markers of different events near the users coordinates.
- Additional resources include Redux, Node.js, Passport.js and PostgreSQL

My Chat Space — *Electron Desktop App*

- Native desktop application that links users social media accounts to create different chat rooms and discuss various social media topics amongst friends and strangers alike .
- Written with standard web technologies including React, CSS3 and Node.js

mySitter — *Mobile Web-Based App*

- mySitter is built to connect local babysitters with parents in need. The app integrates a user interface similar to Tinder where parents can set filters and swipe left or right to find the perfect match
- Built with Express.js, Handlebars.js, and PostgreSQL
